

K238 12VDC / 24 LED / 50mm LAMP KIT

- Parts list
1 X PCB
24 X Superbright white LEDs
8 X 120R 1/4W Resistor
1 X 0.1uF capacitor

This kit only requires 12V @ 130mA making it Ideal for solar and backup lighting systems. One of these kits with one of our 7Ah batteries would run for about 40 Hours continuously. This kit is designed to fit into most downlight fittings. **Note** downlight power supplies often have an AC output, this is not suitable for this kit. It must be powered by 12VDC.
